

Goal

Import data from CSV flat file into SAP HANA.

1. File -> Import

2. Selecting proper wizard

3. Initial panel without any configurations applied.

4. Panel with applied configuration about the CSV file.

5. Fields matching between CSV from file and table in SAP HANA

File Import Wizard

Manage Table Definition and Data Mappings
Manage Table Definition for new tables and source target column mappings

Source File(data_to_load_transaction.csv)

Proposed Table Structure

Name
ID
AMOUNT
TRAN_DATE
POST_DATE
DESCRIPTION
CATEGORY_TEXT

Target Table(DEMOUSER00.TBL_LOADED_DATA)

Store Type: Column Store

Name	DataType	L	S	Key	NotNull	D...	Map...	D...
